

kbview Mixed Media Report

A minimal but genuinely valid PDF, written byte by byte.
It has one page, a Helvetica font resource, a content stream,
and a cross-reference table whose offsets are computed, not guessed.

kbview should render this in its PDF viewer.

Section 1 - Scope

Every file in mixed-media/ is here to prove one handler works.

Section 2 - Fallback

opaque.bin and the extensionless LICENSE next to this file must
fall back to download-only.
